

TLAD Trail Restrictions

Motorized users utilizing trails within this area must stay on designated trails between May 17th and October 19th. Designated trails within the TLAD include:

Osar Lake, Landmark Gap South, Swede Lake, Dickey Lake, and Alphabet Hills.

These routes are identified by route markers with OHV stickers. Outside of the above dates cross country travel is allowed provided there is adequate snow cover. Adequate snow cover is defined as an average of one foot of snow, within a minimum of 6 inches. Over the next few years as resources and archaeological clearances allow, more trails will be opened to motorized use, in and around the TLAD.
